

TELDIO INVENTORY MANAGER

Efficiently track live and historical asset data to streamline inventory management and dispatch information.

HOW IT WORKS

Teldio Inventory Manager offers a user-friendly web interface that allows employees to effortlessly pair devices, such as radios, with their employee IDs by simply scanning the device's barcode, ensuring seamless and efficient tracking and management of your valuable assets. The solution also maintains detailed historical data, providing invaluable insights into device allocation and use.

LIVE ASSET TRACKING

Know which employee is assigned to each device, enhancing operational efficiency and accountability.

AUDIT TRAILS

Keep a comprehensive record of device checkouts and returns, ensuring transparency and security.

USER-FRIENDLY INTERFACE

Designed for all employees, the solution is user-friendly, reducing training time and increasing adoption.

SEAMLESS INTEGRATION

Compatible with any HID Scanner, whether handheld or integrated, providing flexibility in your workflow.

TOUCHSCREEN COMPATIBILITY

Compatible with touchscreen devices, ensuring seamless adaptability into existing operational workflows.

AUTOMATED REPORTING

Receive daily logs via email in CSV format, streamlining administrative tasks and ensuring you have all the data you need.
